

## Excel Assignment #2

**Directions:** You will need to come up with a simple budget to track your spending. You are currently living on your own with a steady job and you have some expenses to pay. Use the categories given to you below. Notice that fixed expenses are given to you, but you will need to decide on your variable expenses. You may add a category to the "Variable Expenses" if you would like, but you do not have to.

You will then need to make a **pie chart** showing your **variable expenses only**. Make sure to add a header and get everything to fit to one sheet.

### **Income:**

Paycheck- \$1,200

Babysitting- \$50

### **Expenses:**

#### Fixed Expenses

Rent- \$400

Car Payment- \$220

Car Insurance- \$130

Utilities- \$50

#### Variable Expenses

Food- (\$75 minimum)

Gas- (\$40 minimum)

Clothing-

Entertainment-

Miscellaneous-

### **Savings:**

At Least \$100
